SANDALI RANDINI

UX/UI Designer | Research-Driven | Mobile & Web Applications

Email: sandalirandini25@gmail.com
Contact No: 0765610991
LinkedIn: www.linkedin.com/in/sandali-randini
Portfolio: www.behance.net/sandali_randini

UX/UI Designer with hands-on experience designing healthcare and offline-first mobile applications. Skilled in user research, workflow analysis, wireframing, and interactive prototyping. Experienced in simplifying complex systems for low-technical-literacy users and collaborating with developers to deliver feasible design solutions.

EXPERIENCES

Research Assistant Intern (UX/UI focused) - University of Colombo School of Computing August 2025 - Present

-Designed & prototyped a web-based healthcare communication platform addressing doctor–patient interaction challenges in physiotherapy.

- Conducted user requirement gathering and secondary research to identify communication gaps in physiotherapy doctor–patient interactions.
- Defined feature structure and user flows to improve clarity and reduce navigation friction.
- Designed low- and mid-fidelity wireframes and interactive Figma prototypes focused on accessibility and empathy-driven interaction.
- Collaborated with developers to ensure technical feasibility and smooth design-to-development handoff.

PROJECTS

UI/UX Design - Offline Fisheries Data Collection App Freelance Project – UCSC Collaboration | Ongoing

-Designed an offline-first mobile application for fisheries officers operating in low-connectivity marine environments.

- Conducted workflow analysis to identify data-entry inefficiencies in real fishing conditions.
- Designed data input forms, filtering systems, and structured dashboards for supervisors.
- Developed low- and high-fidelity prototypes tailored for low-technical-literacy users focused on usability and efficiency.
- Improved data accuracy through simplified interaction flows.

Redesign of doenets.lk Personal UX Initiative | June 2025

-Improved usability of the Department of Examinations Sri Lanka homepage.

- Conducted heuristic evaluation to identify usability issues.
- Restructured information architecture to reduce navigation complexity.
- Categorized service options into clear task-based groupings.
- Designed low-fidelity redesign prototypes to improve accessibility and user efficiency.
- Reduced visual clutter and improved task completion flow.

EDUCATION

University of Sri Jayewardenepura July 2022 - April 2025

BSc in (Physical Science) Information & Communication Technology

CERTIFICATES

Foundations of User Experience (UX) Design by Google — July 2025

UI/UX Bootcamp by STEMLink — July 2025 - October 2025

SKILLS

- Tools – Figma, FigJam, Canva
- UI/UX Design - Wireframing, Prototyping, User Research, Requirement Gathering, Workflow Analysis, User Flow Designing
- Soft Skills – Empathy, Collaboration, Attention to Detail, Communication
